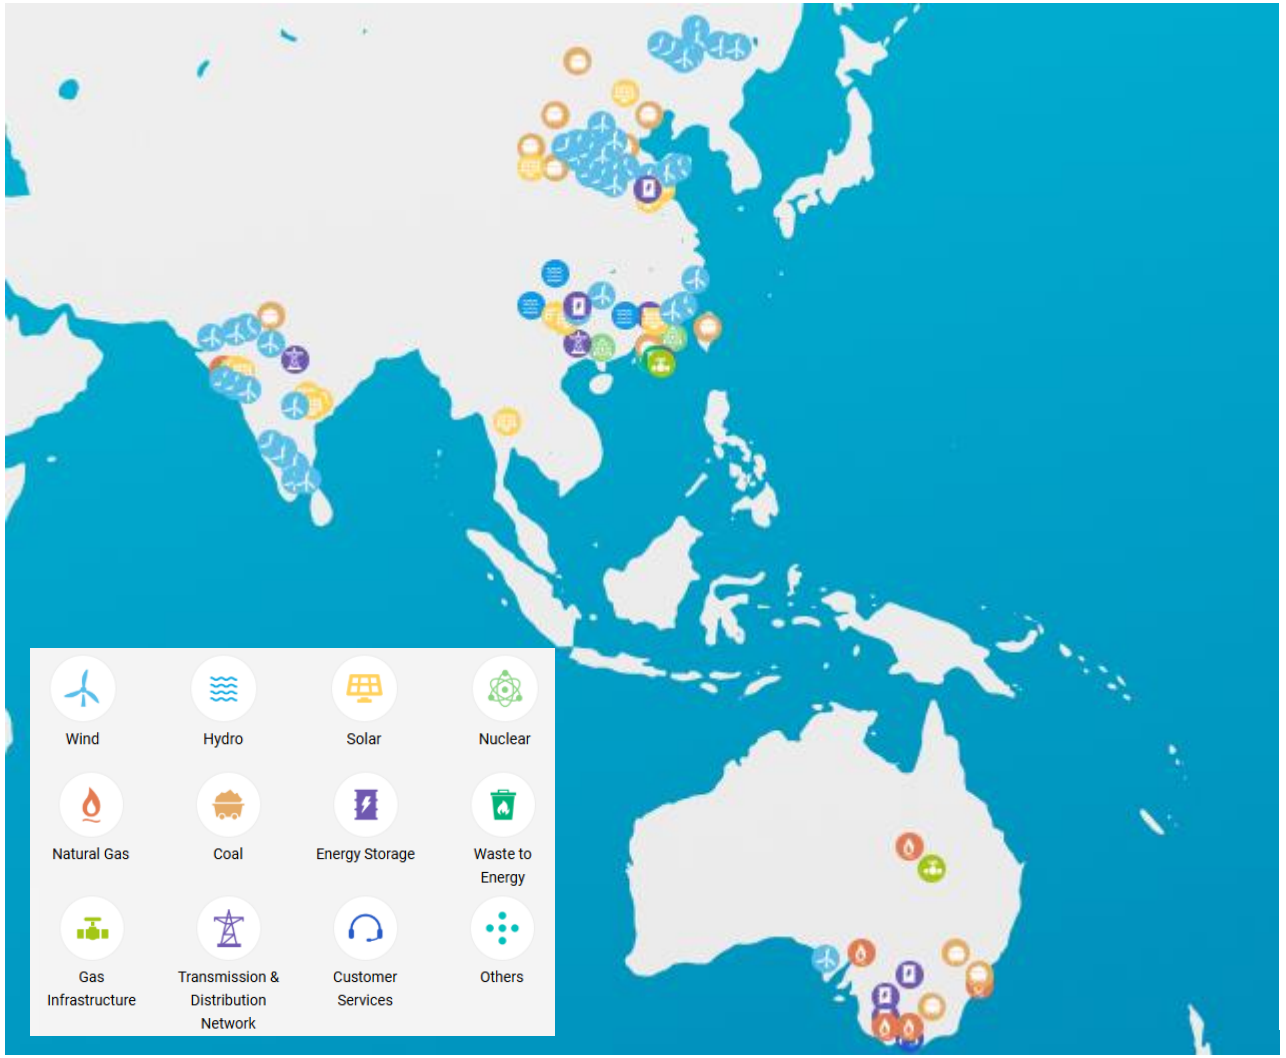
Introduction to CLP Group

August 2025

Confidential

One of the largest power investors in Asia Pacific with assets throughout the value chain

CLP's Regional Presence



Over 5.2 million customer accounts

2.8 million

2.4 million

Smart meters

Over 3.5 million connected for Hong Kong and EA customers

6 Projects (> 6.8 million smart meters) In progress / under development In India

Over 17,000 km transmission lines#

Generation and Storage capacity #

more than 22,500 MW

- Coal 36%; 8,140 MW
- Gas 27%; 6,131 MW
- Nuclear 12%; 2,685 MW
- Others e.g. landfill, diesel, energy storage 5%; 1,206 MW
- Wind 12%; 2,625 MW
- Solar 6%; 1,307 MW
- Hydro 2%; 489 MW

Non-carbon generation* 31%; 7,106 MW

Ownership is balanced between the Kadoorie family and retail and institutional investors

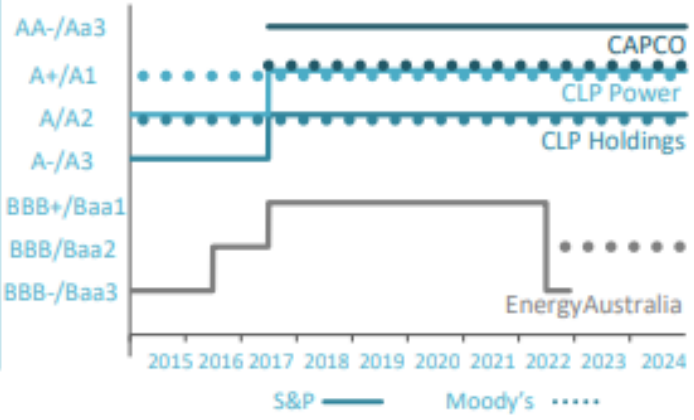
Credit Rating History



Our heritage in Hong Kong

CLP was founded in Hong Kong in 1901 and has grown with the city's rapid development.

1903: First power station (75 kW)

Post war period: Development of the transmission and distribution network

1980: Commissioning of Castle Peak Power Station (Thermal)

1996 – 2024: Development of Black Point Power Station (CCGT)

2023: Commissioning of floating LNG regasification unit

Information Classification: Confidential

CLP is a long-term and operationally focused investor, guided by our core values

CLP's Core Values

Care
We look after people and planet.
Our care builds trusted, long-term relationships and contributes to a better, more sustainable future for all.

Excellence
We seek to deliver better and smarter.
Our curiosity to learn and adopt new ways, and our passion to act fast and deliver more with less, allow us to deliver superior performance, growth, and value.

Responsibility
We do the right things right.
Our integrity and courage to do what is right are the foundations of delivering our purpose and long-term success. We value how results are achieved, not just what has been achieved.

- CLP seeks to be a **trusted, long-term investor and operator** in the markets that it enters. This is backed by our track record:
  - Hong Kong: 120+ years
  - Mainland China: 40+ years
  - Taiwan Region: 20+ years
  - Australia: 20+ years
  - India: 20+ years
  - Thailand: 20+ years

- We are guided by our core values of **Care, Excellence and Responsibility** and seek to be a trusted and capable contributor to the communities that we serve.

- CLP's long-term investment horizon ensures a strong focus on developing **local relationships and talent**, building **connections with the community** and **prioritizing optimal long-term investment and operating outcomes**.

Our revised strategy emphasizes investment in long-term, stable assets that benefit from the energy transition

Opportunities

- Electrification
- Energy Transition

Strategic pillars for sustained growth

1. **Deliver on Climate Vision 2050** 59% reduction in GHG emissions intensity by 2030*, out of coal before 2040, net zero by 2050
   * compared with 2019 baseline
2. **Growth in energy transition in Asia Pacific** based on generation, networks, storage and energy services
3. **Uplift and enhance capability**

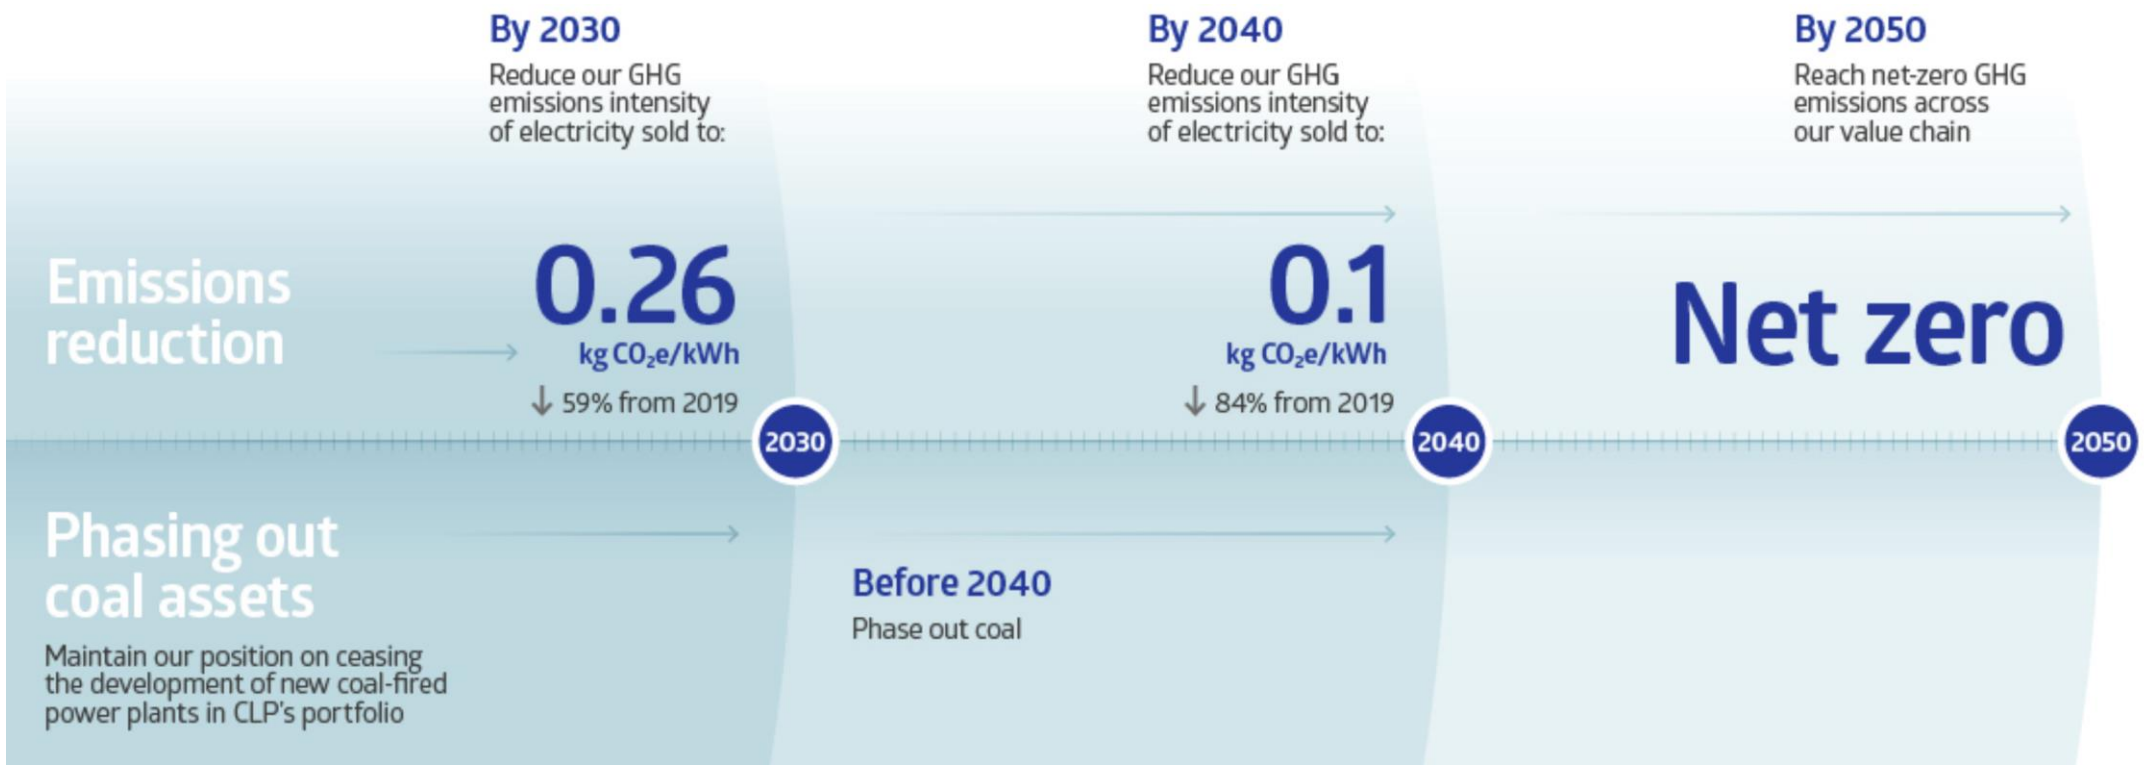
Foundations & Enablers

- People
- Extensive Pipeline
- Brand
- Financial Headroom
- Disciplined capital allocation

Information Classification: Confidential

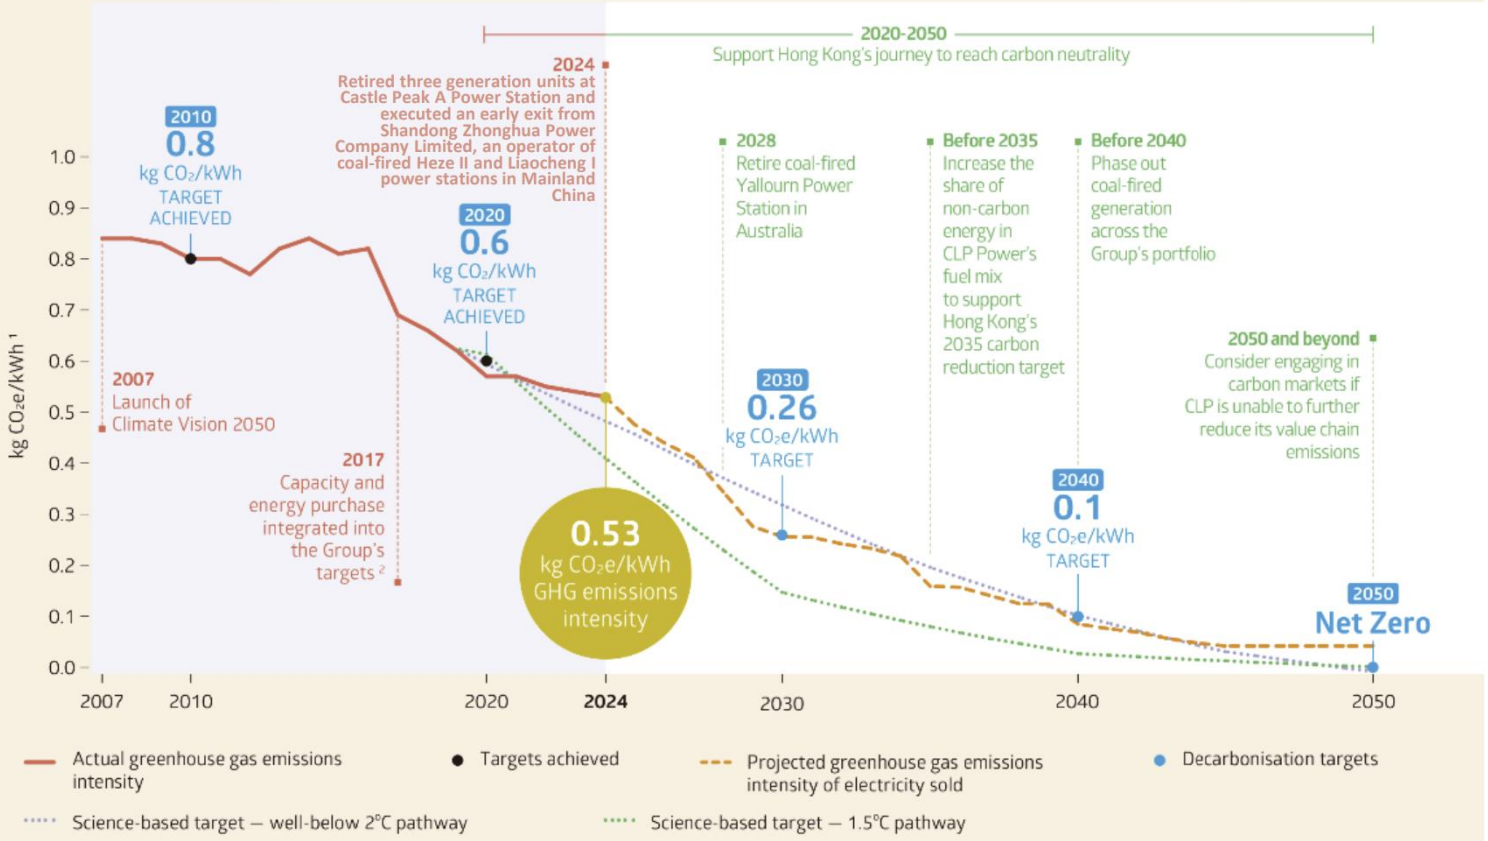
We have committed to reach Net Zero by 2050

CLP's Climate Vision 2050 was originally launched in 2007 and is periodically updated to ensure we have a clear blueprint to decarbonize our operations.



We are making the necessary grid and renewable energy investments to achieve Net Zero by 2050

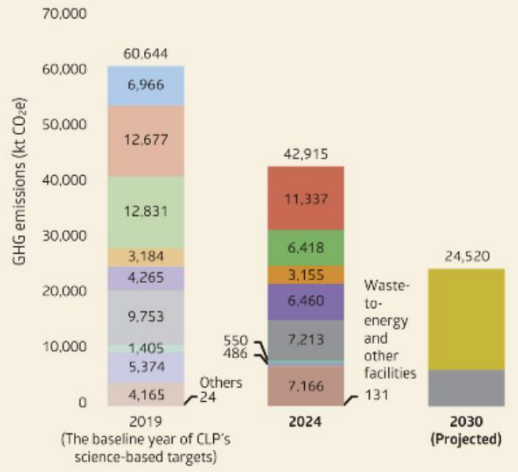
CLP's Past and Projected Greenhouse Gas Emissions Intensity



Notes:

1. CLP's trajectory from 2007 to 2020 was based on the Group's carbon emissions intensity (kg CO_2/kWh). Since 2021, in line with global best practices, CLP has reported its GHG emissions intensity based on kg CO_2e/kWh.
2. CLP's trajectory from 2017 to 2050 is on an equity plus capacity and energy purchase basis.

CLP's past and projected absolute greenhouse gas emissions of electricity sold and phase-out schedule of fossil fuel assets

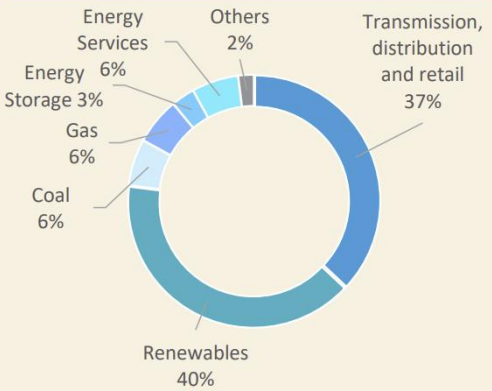


- **Fangchenggang Power Station** Divested in 2022
- **Yallourn Power Station** To be phased out in mid-2028
- **Castle Peak Power Station** A1, A2 and A3 units were retired in 2024; A4 unit is expected to be phased out before 2030; and B units phase out coal by 2035
- **Jhajjar Power Station** To be phased out in mid-to late 2030s
- **Mount Piper Power Station** To be phased out before 2040
- **Minority-owned coal-fired assets in Mainland China and Taiwan Region** To be phased out before 2040
- **EnergyAustralia's gas-fired assets** Operate the assets for their technical lives to support a net-zero grid
- **EnergyAustralia's purchase from the National Electricity Market** Subject to market developments
- **Black Point Power Station** Studying options to convert gas-fired generation before 2050 to the use of hydrogen produced from non-carbon emitting sources and/or deploy carbon capture and storage facilities
- **Purchased energy and assets other than minority-owned coal-fired assets (2030 only)**

Notes:

1. The figures are on an equity plus capacity and energy purchase basis.
2. Numbers have been subject to rounding. Any discrepancies between the total shown and the sum of the amounts listed are due to rounding.

CLP's total planned capital investment for 2025-2029 by asset type



Notes:

1. Capital investment includes: i) capital expenditure in fixed assets, right-of-use assets, investment property, intangible assets; ii) changes in investments and advances to joint ventures and associates; and iii) acquisitions of asset/business. Any minor discrepancy in total is due to rounding of percentages.
2. Renewables include wind, solar, hydro and waste-to-energy.
3. Others include oil, other businesses outside of power generation, transmission, distribution and retail, as well as corporate or enterprise items.
